
KAUSTAV NANDI

STUDENT DEVELOPER / AI ENTHUSIAST

Gurgaon, Haryana | +91 7478212336 | kaustavnandi8@gmail.com
github.com/cool-zinger | linkedin.com/in/kaustav-nandi2007

PROFILE

Student and developer interested in web development, artificial intelligence and computer vision. Builds practical projects with Python and MySQL, and explores automation and cybersecurity. Originally from Burdwan, West Bengal; currently based in Gurgaon.

TECHNICAL SKILLS

Languages and data: Python, JavaScript, MySQL, pandas

Web development: HTML, CSS, React, Node.js, Express, Flask

Tools and computer vision: OpenCV, Git, GitHub, Linux, VS Code

SELECTED PROJECTS

Airport Management System | Python / MySQL

Built an application for managing flights, passengers, boarding passes and airport operations. Includes search and management workflows, QR boarding-pass output, and modules for baggage, employees, runways and security.

PulmoScan AI | Python / Artificial Intelligence

Built an experimental project exploring chest X-ray analysis and the prediction of a specific pulmonary condition.

Applied an image-analysis workflow to a practical computer vision problem; a learning project without claimed clinical validation.

AI Traffic Violation Detection | Python / OpenCV

Exploring vehicle detection, traffic-signal violations and automatic number-plate recognition.

Developing and experimenting with the computer vision workflow to connect violation recognition with number-plate reading.

INTERESTS & RECOGNITION

Computer vision, automation, cybersecurity and web development.
Received second prize in a cybersecurity competition.
